

TECHNICAL COMPARATIVE ANALYSIS BETWEEN YUNDA & OTHER CHINESE BRANDS

The following is submitted for your perusal when comparing the technical differences between OTHER CHINESE BRANDS and YUNDA MACHINERY, the BEST OPTION in China as per NMFC's professional opinion. The underlying chart offers comments and conclusions provided by an independent 3rd Party Mechanical Engineering Review (**not** affiliated with either Yunda or NMFC).

1. Ropes RAGGER Unit

Ragger

YUNDA

OTHER CHINESE BRANDS

Contrastive Content	YUNDA	OTHER CHINESE BRANDS	Comparison
Cylinder stator	Twin Cylinder	Single Cylinder	Double Cylinder operation is more stable, reliable and common as with KADANT .
Rope Guide	Included in the Design	Do not even have it	Without the guide rope device, it is not so easy deflect the guide rope and causes the operation to fault, continuously .
Rope guide	≤ Φ 600mm	≤ Φ 450mm	The diameter of the cut rope of a double Hydraulic Cylinder is larger allowing for the more heavy-duty rope efficiency.
Pinch roller	Double arms	Single arm	The twin arm design is more stable and reliable. A feature KADANT now emulates. Benefit: Lower failure rates.
